# About SZH, rare breeds and €

---

Little bit of history:

- Until 2008: premiums for owners of rare breeds
- 2008-2010: premiums stopped, subsidy system didn't work, €200.000 for SZH to support breeding organisations.
- From 2013: € 80.000 for SZH. Every 5 years evaluation.
- Common Agricultural Policy (CAP/GLB) 2023-2026: € 200.000 for SZH and €3 million of premiums for the farmers/breeders!

# How did we do it

---

- Upcoming sustainable farming
- Chances for the rare breeds in the agro ecological farming systems
- Paraplubestand made premiums workable again
- Evaluation confirmed the unique role of SZH

# Cooperation

---

Ministry: lobby activities became support activities

Platforms: cattle, sheep and goat, small livestock (poultry/rabbits), small producers.

SZH approved locations (for breeding, for education and for products)

# SZH Goals 2023-2026

---

1. Find biggest challenges of breeding organisations
2. Support breeding organisations
3. Look for chances to stimulate sustainable use of genetic recourses, also with suitable regulation.
4. Protect the rare breeds from extinction, for example in case of diseases.
5. Get more knowledge on rare breeds by research, exchange knowledge by giving the stage to farmers.
6. Find ways to promote the rare breeds at potential new breeders
